### Files

Maven is distributed in several formats for your convenience. Simply pick a ready-made binary distribution archive and follow the [installation instructions](#). Use a source archive if you intend to build Maven yourself.

In order to guard against corrupted downloads/installations, it is highly recommended to [verify the signature](#) of the release bundles against the public [KEYS](#) used by the Apache Maven developers.

	Link	Checksums	Signature
Binary tar.gz archive	<a href="#">apache-maven-3.6.0-bin.tar.gz</a>	<a href="#">apache-maven-3.6.0-bin.tar.gz.sha512</a>	<a href="#">apache-maven-3.6.0-bin.tar.gz.asc</a>
Binary zip archive	<a href="#">apache-maven-3.6.0-bin.zip</a>	<a href="#">apache-maven-3.6.0-bin.zip.sha512</a>	<a href="#">apache-maven-3.6.0-bin.zip.asc</a>
Source tar.gz archive	<a href="#">apache-maven-3.6.0-src.tar.gz</a>	<a href="#">apache-maven-3.6.0-src.tar.gz.sha512</a>	<a href="#">apache-maven-3.6.0-src.tar.gz.asc</a>
Source zip archive	<a href="#">apache-maven-3.6.0-src.zip</a>	<a href="#">apache-maven-3.6.0-src.zip.sha512</a>	<a href="#">apache-maven-3.6.0-src.zip.asc</a>

- Release Notes
- Reference Documentation
- Apache Maven Website As Documentation Archive
- All current release sources (plugins, shared libraries,...) available at <https://www.apache.org/dist/maven/>
- latest source code from source repository
- Distributed under the Apache License, version 2.0

### Previous Releases

It is strongly recommended to use the latest release version of Apache Maven to take advantage of newest features and bug fixes.

If you still want to use an old version you can find more information in the [Maven Releases History](#) and can download files from the [archives](#) for versions 3.0.4+ and [legacy archives](#) for earlier releases.

**Step 2::** Extract the downloaded zip and copy paste in any of your Drives.

**Step 3::** Open the extracted “apache-maven-3.6.0-bin” folder and go to bin folder, copy the path location

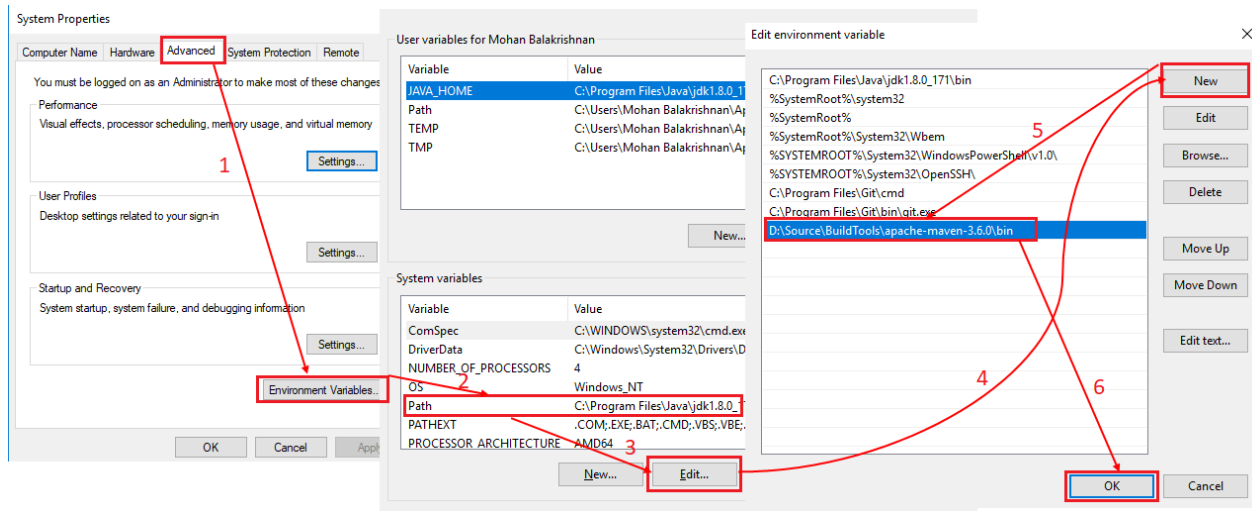

**Eg: E:\apache-maven-3.6.0\bin**

**Step 4::** Set the maven path as a environmental path variable

- Go to the below location in your machine.  
→ **Path:** Control Panel\System and Security\System
- Click on “Advanced system settings” and click on Environment Variables

Add the Maven path in the Path variable under the System Variables

→ Eg: E:\apache-maven-3.6.0\bin

For windows 7 version system add the path as given below

**Note:** Don't delete the existing values from the Variable\_Value. Add semi Colon(;) at the end & add Maven path as mentioned in above pic.

**Step 6::** Go to **Command** window and type **mvn -version** as a command and enter.  
Confirm the installation with the below reference snap

```
Command Prompt
Microsoft Windows [Version 10.0.17134.648]
